September 2011

Our involvement with Western Business Systems began almost 10 years ago when we chose them to supply and install the equipment in our ICT suite. They did such an excellent job that we have since used them to supply and set up:

- interactive whiteboards and data projectors in all our classrooms
- 2 laptop trolleys
- Our classteachers' laptops
- all our printers
- upgraded machines and a server in our ICT suite
- our wireless network

AND we also take advantage of Western's technician service for a day each month.

They have always provided us with good advice and have frequently offered to come into school to solve problems for us at very short notice. Their prices are very competitive and, unlike some other companies, they have always suggested the best equipment to meet our needs rather than the most expensive. We don't have any IT specialists in school so the technician service has proved invaluable and every technician who has visited school has been friendly, helpful and efficient. Many members of staff have pointed out how nice it is to be able to explain IT problems without being patronised or baffled by jargon.

We can recommend Western without reservation!

Rebecca Coxon (Deputy Headteacher & IT Co-ordinator)

Headteacher: Mrs Elizabeth Morey
